

PREVENTION INSIGHTS  
2022 MAIN FINDINGS

# INDIANA YOUTH SURVEY

(Formerly known as Alcohol, Tobacco and Other Drug  
Use by Indiana Children and Adolescents)

## AAA School Corporation 6th Grade Students

Survey Conducted January through April 2022  
Report Dated July 2022

**Conducted by: Prevention Insights  
School of Public Health-Bloomington  
Indiana University  
Sycamore Hall, Fourth Floor  
1033 E. Third Street  
Bloomington, IN 47405-7005**

<http://www.INYS.indiana.edu>

INYS@indiana.edu

Toll free: 1-800-346-3077

Fax: 812-855-4940

Funded in part by a contract with the Indiana Family and  
Social Services Administration - Division of Mental Health  
and Addiction

## INDIANA YOUTH SURVEY

Thank you for participating in the 2022 Indiana Youth Survey! Your participation allows us to collect valid data about children and adolescents across the state of Indiana. We can then present this data to state officials so they can better understand the students in Indiana as well as identify and address any issues related to substance use and mental health.

We also hope that your INYS report results will be of value to your school/corporation. We believe these results can help you better understand your student body, inform school policies, select prevention programs or curricula, collaborate with community prevention efforts, and provide necessary data for grant and funding applications.

If you have any questions about your report, please contact the INYS Coordinators at 1-800- 346-3077 or at [INYS@indiana.edu](mailto:INYS@indiana.edu).

Want additional help utilizing YOUR survey results to address health and educational barriers or write successful grant applications? Prevention Insights offers tiered Technical Assistance services to meet the needs of your school or corporation. Email [TAHelp@indiana.edu](mailto:TAHelp@indiana.edu) for information and pricing.

Thank you!

Note: A single copy of this report was prepared for the designated local survey coordinator. The local data contained herein are the property of the local survey sponsor. They will not be released to anyone else by Prevention Insights. The local survey sponsor may determine whether or not to release these data to anyone else. If released, a reference to the source would be appreciated. Statewide data are the property of Prevention Insights and the Trustees of Indiana University, and they are copyrighted. Permission is granted to distribute the statewide results with the copyright notice.

\*Frequency Tables present student responses in percentages. Responses are presented in the order they are found on the survey questionnaire.

**Sample survey questionnaires for 6th graders and 7th-12th graders are available on the INYS website: <https://inys.indiana.edu/about-survey>**

## **Part I: Survey Information and Summary of Results**

## Criteria for Usable Surveys

The table below describes the number of surveys collected from participating students in your school/corporation. There is a protocol for checking errors to eliminate unreliable responses. A survey meeting any one of the following exclusion criteria was not included in the data analysis:

- Majority of the survey questions were left unanswered
- Student indicated they did not answer survey truthfully
- Student indicated use of fictitious drug
- No gender or grade information provided
- Implausible combination of age and age of first-time use of substances
- Inconsistent responses
- Pharmacologically implausible responses

Only valid surveys (**Usable surveys**) were included in the final analyses.

### Number of Usable Questionnaires AAA School Corporation Students, 2022 (Count, Percentage)

		Year	
		2022	
Criteria	Blank surveys/Refused to participate	1	0.1
	Not truthfully at all response	7	1.0
	Indicated fictitious drug (vivo) use	3	0.4
	Rejected by gender check	8	1.1
	Rejected by grade check	2	0.3
	Rejected by age and onset age check	.	.
	Rejected by consistent use check	.	.
	Rejected by dose check	.	.
	<b>Usable surveys</b>	<b>690</b>	<b>97.0</b>
	Total	711	100.0

## Demographic Information

The following table shows the demographic characteristics of the participating students from your school corporation. Please note that NO DATA will be presented in this report for any **grade level with fewer than 30 usable surveys**. This is to protect the **confidentiality** of your students.

### Demographic Information AAA School Corporation Students, 2022 (Valid cases only: Count, Percentage)

		Year	
		2022	
Q1 Gender	Male	360	52.2
	Female	330	47.8
Q2 Hispanic/Latino	Non-Hispanic	534	81.3
	Hispanic	123	18.7
Q3 Race	White	453	69.7
	Black/African American	19	2.9
	Asian	60	9.2
	Native Hawaiian/Pacific Islander	3	0.5
	American Indian/Alaskan Native	13	2.0
	Race not known or other	40	6.2
	More than one race	62	9.5
Q4 Grade	6th	690	100.0
Q5 Age	10 years or younger	0	0.0
	11 years	180	26.3
	12 years	483	70.5
	13 years or older	22	3.2

## Using INYS State and Regional Data

We encourage schools and corporations to compare their results with INYS State and Regional data. This **comparison** is needed to answer the following questions:

- How should we interpret a particular data point? For example, is our school's rate of 6<sup>th</sup> grade alcohol use concerning, or typical for 6<sup>th</sup> graders in other locales?
- In what areas are we leading our Region or Indiana peers?
- In what areas are we "behind" our Region or Indiana peers?
- If our school or corporation is new to the INYS or lacks trend (previous year) data, what trends are our Region or Indiana peers seeing that we might monitor for locally?

The INYS has used probability sampling to collect statewide data since 2016. Regional data uses convenience sampling (schools participate voluntarily) and may not be representative of a region's youth. Every INYS State Report includes information about participation rates by Region, with higher participation rates indicating a more accurate regional picture.

Refer to the Indiana Youth Survey 2022 Report, previous year State Reports, and data visualization tools available at <https://inys.indiana.edu/survey-results> to compare, contrast, and contextualize local data.

**Please compare school- or corporation-level data to State or Regional data if possible.**

**The INYS State Report includes tables with State and Regional data. Narrative sections of the Report discuss trends observed over time.**

**Use caution when using Region data for comparison. INYS regional data may not be representative of general attitudes and behaviors.**

## Prevalence Rates for Alcohol, Tobacco and Other Drug Use

**Monthly prevalence rate** is defined as the percentage of students who reported using a particular substance at least once within the past 30 days. The following table shows the monthly prevalence rates among your school/corporation’s students who participated in the survey. If your school/corporation has participated in the survey more than once in the past ten years, trend data are provided so that you can monitor changes in prevalence rates between years.

Please note that the cleaning protocol used by Prevention Insights to determine valid surveys was changed in 2015. These changes were made to better align the methodology with that used by national surveys. These changes may have a noticeable effect on the reported rates, especially for alcohol and marijuana use. Therefore, caution should be used when comparing data between years.

**Trend data (if available) allows us to observe changes in local students’ behavior and attitudes over time.**

**Use caution when comparing pre-2015 data with more current data.**

### Past Month Use of Alcohol, Tobacco, and Other Drugs AAA School Corporation 6th Grade Students

	Year					2019	2020	2022
	2013	2015	2016	2017	2018			
Q8 Cigarettes	2.3	1.6	2.4	0.7	1.0	1.1	1.0	1.4
Q8 Alcohol	3.6	3.2	4.8	3.7	5.0	4.2	4.4	3.1
Q8 Marijuana	0.9	1.0	2.4	0.3	0.5	0.5	1.3	1.3
Q8 Inhalants	0.4	0.1	0.0	0.8	1.0	0.9	0.9	1.0
Q8 Prescription drugs	0.8	1.3	0.0	1.5	1.5	2.5	1.9	1.8
Q8 Other illegal drugs		0.0	2.4	0.0	0.0	0.0	0.4	0.3

## Mean Age of First Time Use of Alcohol, Tobacco and Other Drugs

Research has shown that the younger a person is when she or he begins using alcohol, the more likely the person is to experience alcohol dependence and abuse.<sup>1,2</sup> Compared to persons who began drinking at age 21 or older, those who began drinking before age 14 were more likely to experience alcohol dependence later in life.<sup>3</sup> The table below shows the average age of first use among students who reported using a particular substance at least once during their lifetime.

**Delaying** age of first-time substance use lowers a young person’s risk of developing substance use dependence later in life.

### Mean Age of First Time Alcohol, Tobacco, and Other Drug Use AAA School Corporation Students, 2022 (Valid cases only: Mean age)

	Grade
At what age did you first use...?	6th
Q9 Cigarettes	10.56
Q9 Alcohol	10.50
Q9 Marijuana	10.90
Q9 Inhalants	10.56
Q9 Prescription drugs	10.50
Q9 Other illegal drugs	10.33

1 Grant, B. F., Stinson, F. S., & Harford, T. C. (2001). Age at onset of alcohol use and DSM-IV alcohol abuse and dependence: A 12-year follow-up. *Journal of Substance Abuse, 13*(4), 493-504.

2 Warner, L. A., & White, H. R. (2003). Longitudinal effects of age at onset and first drinking situations on problem drinking. *Substance Use & Misuse, 38*(14), 1983-2016.

3 Hingson, R. W., Heeren, T., & Winter, M. R. (2006). Age at drinking onset and alcohol dependence: Age at onset, duration, and severity. *Archives of Pediatrics & Adolescent Medicine, 160*(7), 739-746.

## Communities that Care (CTC) Risk and Protective Factors

**Risk factors** are conditions that increase the chances that children will become involved in problem behaviors in adolescence and young adulthood.<sup>1</sup> Measures included in the *Indiana Youth Survey* from the Communities That Care (CTC) System can predict alcohol and other drugs use, as well as delinquency, dropping out of school, teen pregnancy and violence. Students with elevated risk factor scores have a higher likelihood of substance use and problem behaviors compared to those with low risk factor scores.

CTC is based on the Social Development Strategy which focuses primarily on the strengthening of protective factors. **Protective factors** are conditions that have a positive influence and “protect” or “buffer” against the negative influences associated with risk factors. Though closely related, protective factors are not the opposite of risk factors but rather reduce the effects of existing risk factors.

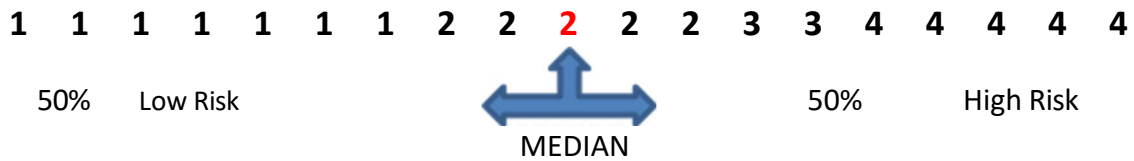

**Protective factors buffer the impact of risk factors that young people are exposed to at the individual, peer, family, school, and community domains.**

Youth responding to the 2022 INYS answered survey questions related to eighteen CTC scale items (5 risk factors and 6 protective factors). Survey questions and responses used to determine CTC scores are found in [Part II: Answers to All Survey Questions](#).

Prevention Insights uses a **cut-point** method to identify elevated risk factors and depressed protective factors on the *Indiana Youth Survey* for students in grades 6, 8, 10 and 12.<sup>2</sup> Survey respondents were divided into two categories – low risk and high risk for risk factors, and low protection and high protection for protective factors– based upon national data. Students from around the country were asked the same questions.

For example, youth were asked: “How much do you think people risk harming themselves if they try marijuana once or twice?”

All of the responses from the national survey were scored with a numerical value and put in order from lowest to highest, and the middlemost score was identified. This score is the median and it divided all responses into two halves (50% of responses are at/below the median and 50% are above the median). The median was used to determine the cut point for low and high groups. In this example, any youth that indicated a 2 or higher is considered to be at high risk.

In simple terms, if 50% of the students in Indiana are at high risk and 50% are at low risk on a particular risk factor, then the Indiana students are similar to the nationwide data. **Problem areas are considered to be any risk factors with 50% or more of students showing high risk or any protective factors with 50% or more of students showing low protection.** The following table shows the percentage of students at low or high risk for fourteen different risk factors, while the second table shows the percentage of students at low or high protection for six protective factors. **Please take note of bold numbers over 50.0.**

Data in school- or corporation- level reports may also be compared to regional and state averages. It is worthwhile to know how local students measure up against their Region or Indiana peers, even if neither group exceeds the 50% cut-point (the national average). Do the issues and trends we see locally align with those faced by our neighbors and peers across the state? Or, are we facing unique local challenges or opportunities?

**Bold numbers in the chart below show us the percentage of local students whose likelihood to engage in problem behaviors—alcohol and drug use, delinquency, dropping out of school, teen pregnancy, and violence—is higher than the national average.**

**Percentage of students with CTC risk factor scores  
at/below (low risk) or above (high risk) the national standard  
AAA School Corporation Students, 2022**

		Grade
		6th
Risk score - Poor family management	Low risk	64.3
	<b>High risk</b>	<b>35.7</b>
Risk score - High family conflict	Low risk	56.8
	<b>High risk</b>	<b>43.2</b>
Risk score - Parental attitudes favor drug use	Low risk	82.4
	<b>High risk</b>	<b>17.6</b>
Risk score - School academic failure	Low risk	59.3
	<b>High risk</b>	<b>40.7</b>
Risk score - Peer-individual perceived risk of drug use	Low risk	41.5
	<b>High risk</b>	<b>58.5</b>

Note: The national standards (cut-off points) are provided by the Social Development Research Group at the University of Washington.

**Bold numbers in the chart below show us the percentage of local students whose level of protection against problem behaviors is lower than the national average.**

**Percentage of students with CTC protective factor scores  
at/below (low protection) or above (high protection) the national  
standard  
AAA School Corporation Students, 2022**

		Grade
		6th
Protective score - Community rewards for involvement	<b>Low protection</b>	<b>65.8</b>
	High protection	34.2
Protective score - Family opportunities for involvement	<b>Low protection</b>	<b>40.8</b>
	High protection	59.2
Protective score - Family rewards for involvement	<b>Low protection</b>	<b>49.2</b>
	High protection	50.8
Protective score - School opportunity for involvement	<b>Low protection</b>	<b>35.6</b>
	High protection	64.4
Protective score - School rewards for prosocial involvement	<b>Low protection</b>	<b>38.7</b>
	High protection	61.3
Protective score - Peer-individual interaction with prosocial peers	<b>Low protection</b>	<b>60.2</b>
	High protection	39.8

Note: The national standards (cut-off points) are provided by the Social Development Research Group at the University of Washington.

Identification of elevated risk and low protection is important to addressing several problem behaviors among youth. Implementation of evidence-based curricula and environmental strategies is the best way to address these issues.

**Substance use prevention efforts mitigate risk factors or bolster protective factors to decrease youth substance use and other problem behaviors.**

## Mental Health

Prior research has demonstrated robust relationships between adolescent depression, suicidal behavior and substance abuse.<sup>1,2,3</sup> As a result, the State is trying to better understand the prevalence of mental health concerns among Indiana’s youth. Mental health was measured for the past year (12 months) with survey items that asked about “feeling so sad or hopeless almost every day for two weeks or more in a row that you stopped doing some usual activities,” “seriously consider attempting suicide,” and “making a plan about how you would attempt suicide.” Since the survey is anonymous, individual students and their mental health problems cannot be identified. Thus, it is advised that referral resources be a part of your school’s student assistance policy.

**Poor youth mental health is strongly associated with youth substance use and other risky behaviors. Prevention efforts may address them simultaneously.**

**INYS mental health measures are not connected to individual students. Direct screening is necessary for referral to treatment.**

### Mental Health in the Past Twelve Months AAA School Corporation Students, 2022 (Values are percentages, valid cases only)

		Grade
During the past 12 months, did you...?		6th
Q21 Feel sad or hopeless for 2+ weeks in a row	No	67.3
	<b>Yes</b>	<b>32.7</b>
Q21 Seriously consider attempting suicide	No	85.7
	<b>Yes</b>	<b>14.3</b>
Q21 Make a plan about attempting suicide	No	88.7
	<b>Yes</b>	<b>11.3</b>

## **Part II: Responses to All Survey Questions**

## Frequency Tables

The responses to all survey questions are presented in this section, in three segments. The tables are first presented by grade level, followed by tables including only male student responses, and lastly tables including only female student responses. **The responses to the individual items that make up each of the CTC risk and protective factors are provided.**

The frequency tables are presented in the following order in each of the segments:

- Personal and Family Information
- Past Month Use of Alcohol, Tobacco, and Other Drugs
- Age Distribution of First Time Alcohol, Tobacco, and Other Drug Use
- Perceived Risks of Drug Use
- Perceived Peer Approval of Drug Use
- Parental Attitudes Favorable Toward Drug Use
- Parental Attitudes Favorable Toward Antisocial Behavior
- Mental Health in the Past Twelve Months
- Poor Family Management
- Family Conflict
- School Opportunities for Prosocial Involvement
- School Rewards for Prosocial Involvement
- Academic Failure
- Family Opportunities for Prosocial Involvement
- Family Rewards for Prosocial Involvement
- Community Rewards for Prosocial Involvement
- Interaction with Prosocial Peers

## All Students

**Personal and Family Information
